Jimpsons

Web3 Prediction Market Platform

https://jimpsons.org

Key Problems in the Industry

1 **Exclusionary Onboarding**

High gas fees and seed phrase complexity deter 88% of users.

2 **Systemic Prediction Failures**

Polymarket's flawed 86% GOP Senate odds(2022) collapsed due to manual verification delays.

3 **NFT Value Erosion**

Beeple's $69M NFT dropped to <$10M; IP retention issues plague NFTs.

4 **Governance Centralization**

MakerDAO a16z (6% MKR veto power); Uniswap's 2023 fee vote dominated by whales(90% control).

5 **Incentive Misalignment**

Axie's SLP token fell 99% after $3B founder sell-off; STEPN's GMT saw similar collapse.

6 **AI Integration Risks**

Ethereum's Dencun upgrade revealed zkML's centralized decryption requirements, conflicting with blockchain transparency.

Jimpsons Solutions

1 **Frictionless Access**

Gas-free minting + 2-5x HODL rewards lower entry costs. Modular social logins and AI-guided NFT creation simplify onboarding.

2 **Prediction Integrity**

AVAI Oracle's multi-source verification + quadratic voting disputes ensure accuracy; flawed predictions are auto-burn.

3 **NFT Valuation Engine**

Accuracy-based Prophet Status tiers (Bronze-Diamond) + JIMP staking vaults link NFT value to platform utility.

4 **Meritocratic Governance**

(Staked JIMP) voting weights + guardian-led multi-layered audits counter whale dominance.

5 **Trustless AI**

DAO-controlled oracle updates balance transparency with privacy via zkML audits and IPFS decision logs.

6 **Gamified Ecosystem Engine**

4x4 JIMP TAC TOE drives engagement, trains AVAI Oracle with gameplay data, and rewards strategic wins with governance power boosts and NFT minting rights.

7 **Aligned Incentives**

Time-locked 5x JIMP multipliers + tiered governance (5k-100k tiers) with founder anti-dump slashing.
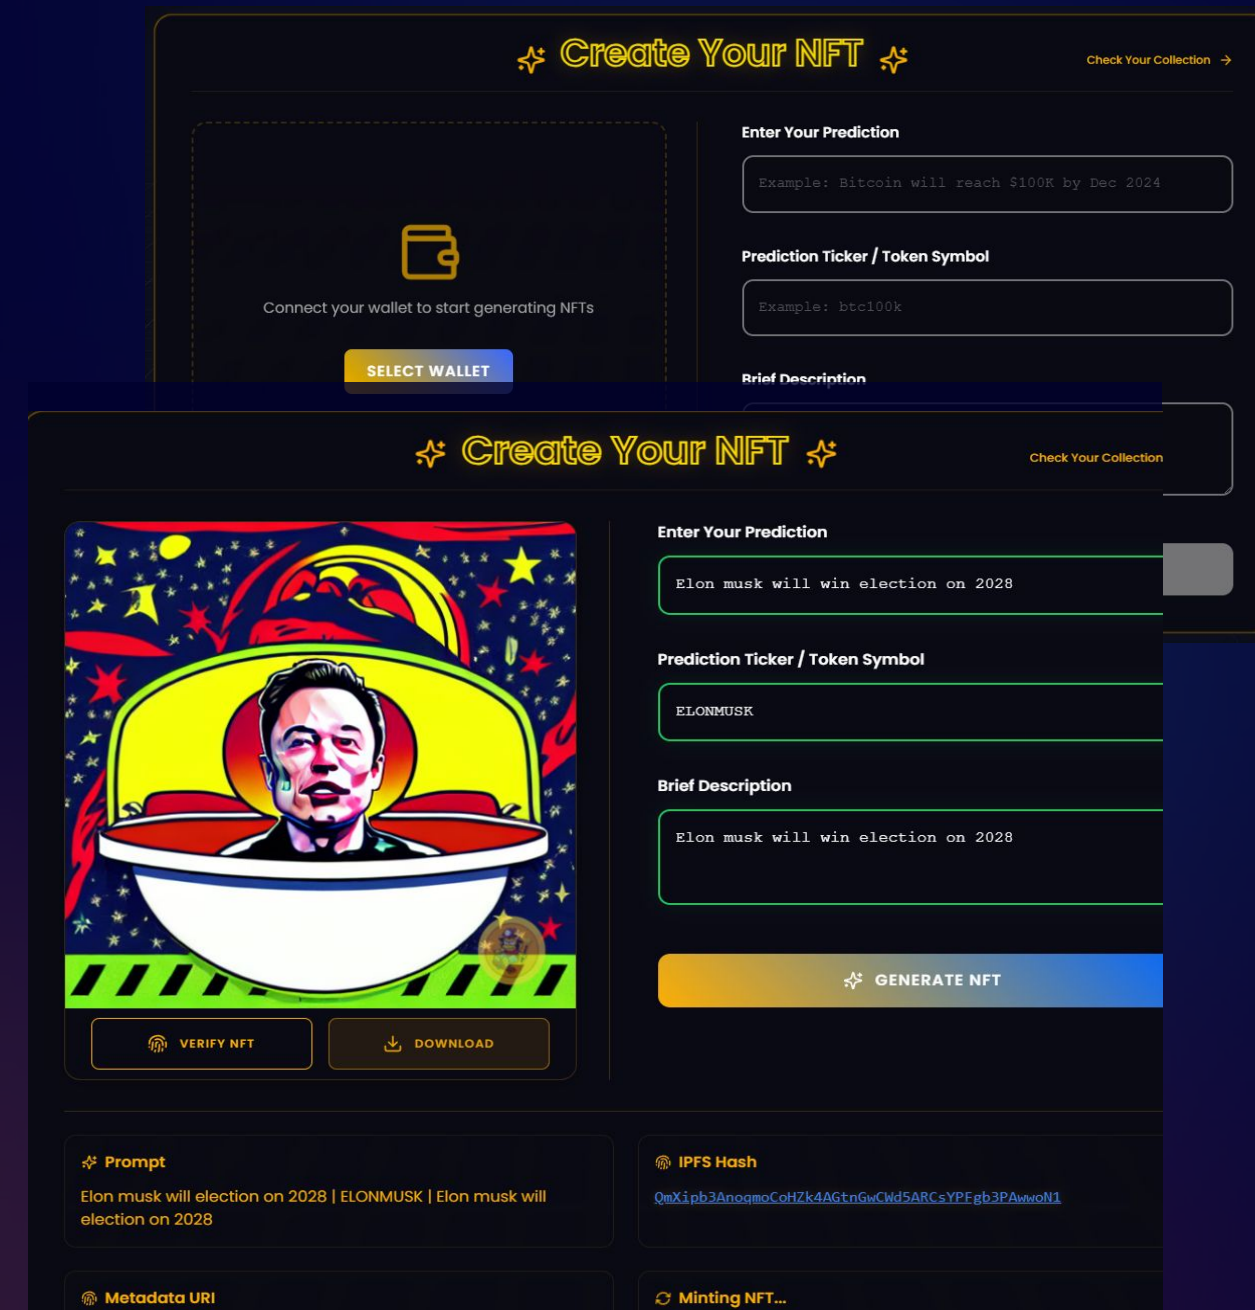

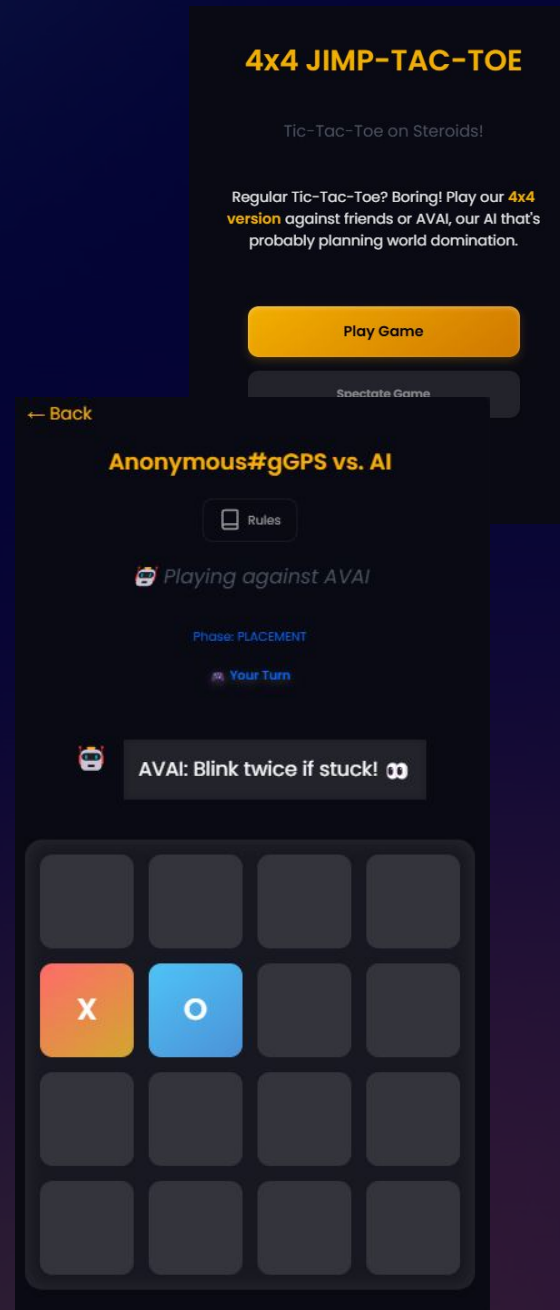

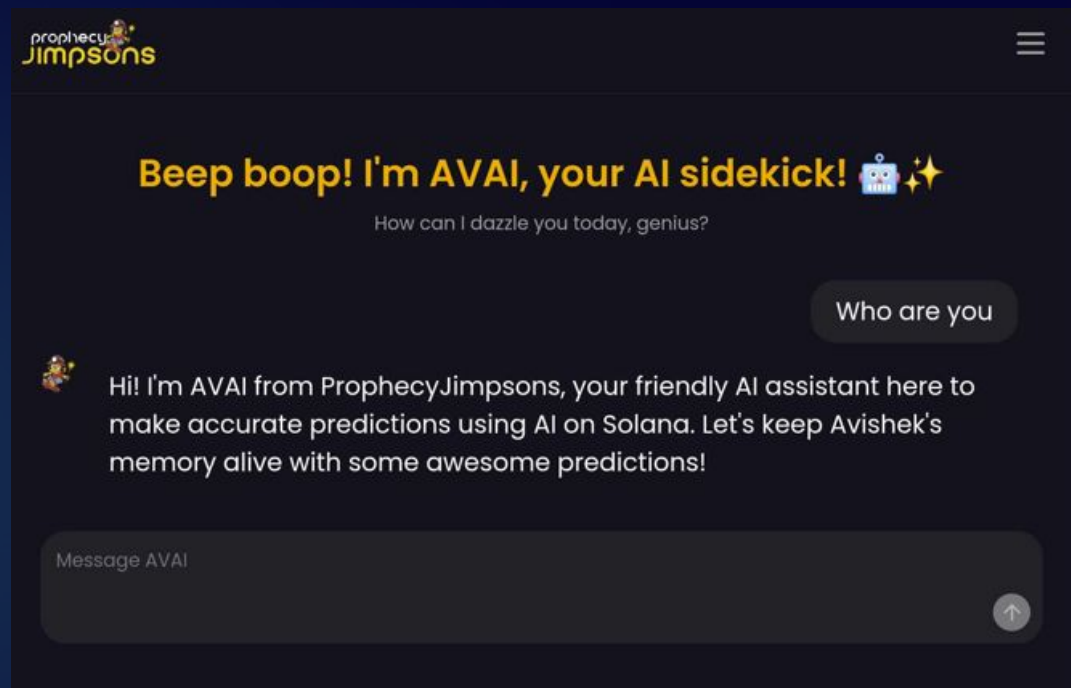

Vision

To establish the global standard for decentralized prediction ecosystems where accurate foresight creates universal value.

Mission

Democratize financial foresight through free, quantum-proof prediction markets powered by community governance and Solana's speed.

MVP (Minimum Viable Product)

"Our MVP combines AI, NFTs, and gaming to deliver an engaging Web3 experience."

Go-To-Market Strategy

1

2

3

4

Target Audience

Web3 enthusiasts, prediction market participants, NFT collectors, DeFi investors.

Content Marketing

Blog, social media, community outreach, SEO optimization.

Virality

NFT minting campaign, leaderboards, exclusive NFT traits.

Referral Program

Multi-tier system with JIMP token and NFT rewards.

Roadmap

Q1 2025: Platform Foundation

Token launch, beta releases of Jimp-Tac-Toe and AVAI model development.

Q3 2025: Core Features

Marketplace development, UX improvements, 99% prediction accuracy target.

1 **2** **3** **4**

Q2 2025: Verification Infrastructure

AI Oracle enhancement, security enhancements, weekly free predictions.
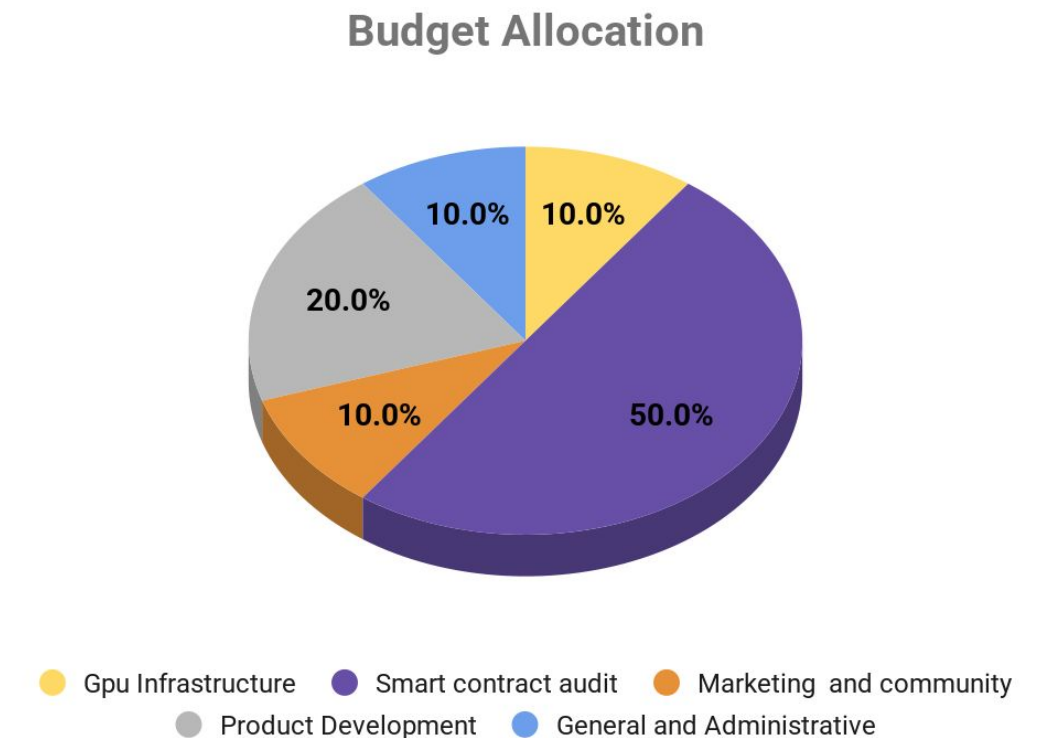

Q4 2025: Governance

DAO implementation, community programs, documentation portal launch.
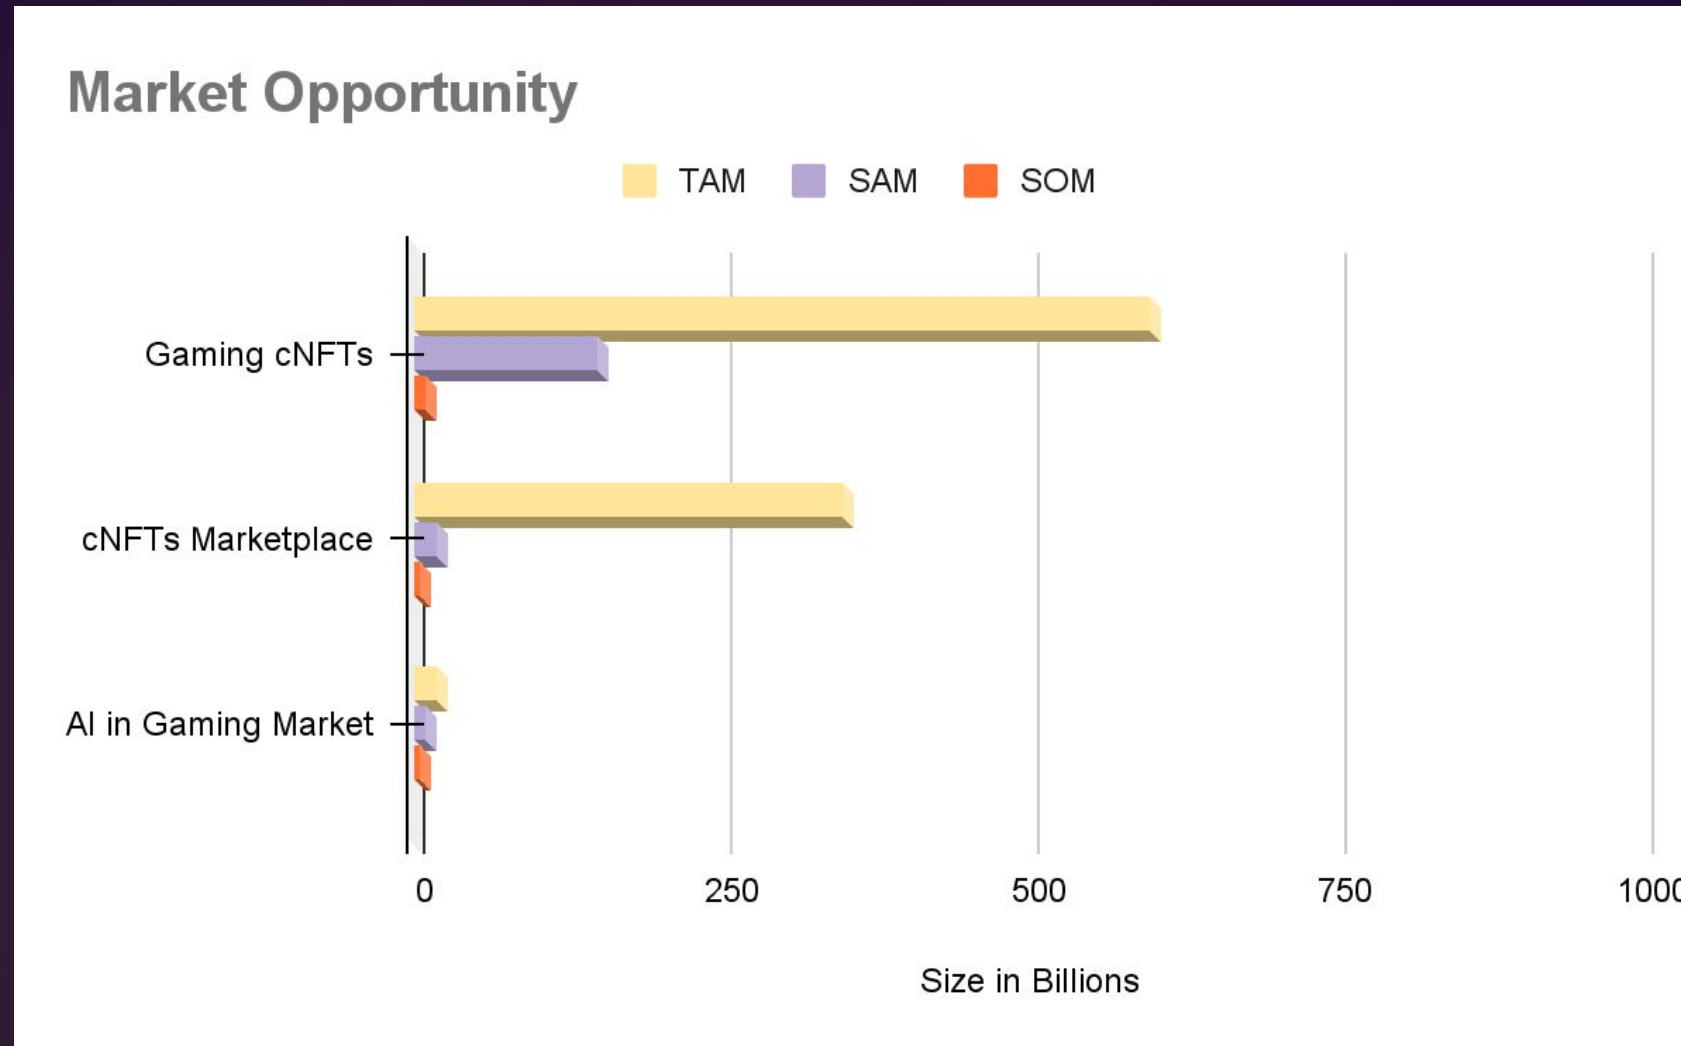

Financials

We are raising an equity financing round of USD 2.2M.

Targets with the funding

- **50%:** Ensuring platform security and trust through extensive third-party smart contract audits to eliminate vulnerabilities and maintain transparency.

- **20%:** Building and refining core features like AI integration, NFT tools, and scaling infrastructure to create a robust and user-friendly platform.

- **10%:** Marketing campaigns, partnerships, and community engagement to onboard 50,000 active users by the end of 2025 and grow the Web3 presence.

- **10%:** Enhancing computational power for AI models and blockchain operations to ensure fast and reliable performance.

- **10%:** Covering operational expenses, including salaries, legal fees, and tools for smooth day-to-day management as the platform scales.

Budget Allocation

10.0% — 10.0%
20.0%
10.0%
50.0%

- Gpu Infrastructure
- Smart contract audit
- Marketing and community
- Product Development
- General and Administrative

Market Opportunity

The bar chart displays the Total Addressable Market (TAM), Serviceable Addressable Market (SAM), and Serviceable Obtainable Market (SOM) in billions, providing a visual comparison of the overall market potential against more focused, attainable market segments.
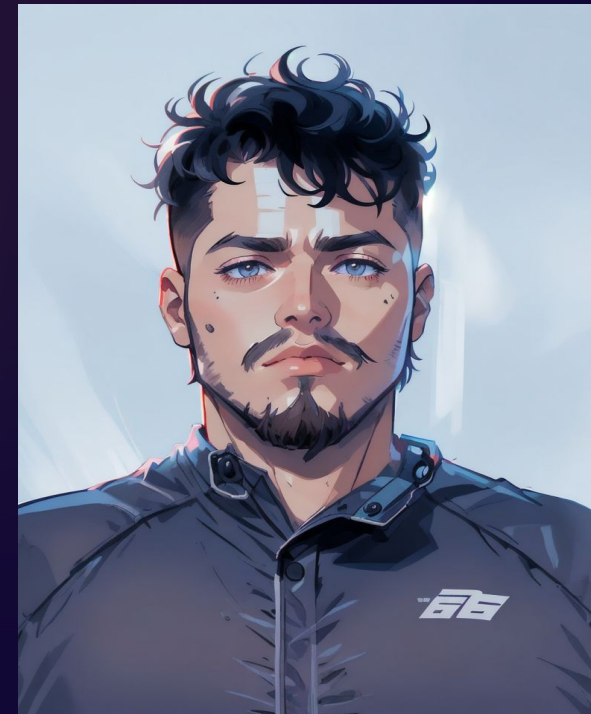

Meet the Team

Ashish Regmi
Co-Founder,
AI/Blockchain Engineer

Experience

- Zero-cost AI NFTs: (on-chain metadata)
- Top zkAuth: @ ETHGlobal (WorldCoin/Sybil)
- HackFS Grand Prize: (FHE+ZK storage)
- StarkFS Award: (99.8% gas cut via Sunya)
- JobPortalDAO: @DORA (quadvoting+SBT)
- EAST framework: (LLM sparsity)

Unfair Advantages

- Privacy-first web3: ZK/FHE/Merkle + EAST @6+ chains
- Proven innovation: 4 wins (2024) across ETH, Filecoin, Base, StarkWare & more

Sagar Budhathoki
Co-Founder,

Software Architect

Experience

- Led enterprise Typescript/React architecture with focus on security and scalable systems.
- Architected privacy-first storage platform using cutting-edge cryptographic solution.
- Engineered microservices architecture reducing system latency by 60%.

Unfair Advantages

- Deep expertise in crypto innovation, bridging Web2 and Web3 technologies.
- Demonstrated ability to execute complex technical to scale.

Meet the Team

Experience

- Winner of HackFS 2024 ("HimalayaZkBarrier") and StarkHack 2024 ("Sunya")
- Led team development for hackathon projects
- Experienced smart contract developer
- Proficient in blockchain technologies and programming languages

Ang Lakpa Sherpa
Co-founder,

Chief Product Officer

Unfair Advantages

- Dual expertise in technical development and team leadership, with a business-oriented approach to projects
- Hands-on experience with cutting-edge blockchain technologies

Experience

- Designed enterprise-grade infrastructure with high availability and scalability.
- Implemented automated CI/CD pipelines, achieving 15s build times for rapid deployments.
- Deployed AWS-hosted IPFS clusters for censorship-resistant

Sameer Karki,
Co-founder

Devops Engineer

Unfair Advantages

- Ensures fast and reliable software delivery with optimized CI/CD pipelines.
- Enhances data integrity and availability through IPFS-based storage solutions.

Meet the Team

Ashish Baral,
Co-founder

WEB3 Team Orchestrator

Experience

- P2P Lend (ETHGlobal 2022).

- Developer coordinations, marketing, and outreach for a cNFT prediction market on Solana.
- Maintained visibility and user engagement.

Unfair Advantages

- Investor & Ecosystem Outreach.

- Bridging Builders and Stakeholders.

- Guardrails, Not Micromanagement.

- Focused marketing efforts on user education and long-term engagement

Chiran Gurung,
Co-founder

WEB3 Frontend Engineer

Experience

- Frontend Engineer with expertise in React.js, Next.js, and Tailwind CSS.

- Developed Web3 applications with blockchain integrations like Solana RPC and NFT creation

Unfair Advantages

- Multiple hackathon wins, including HackFS 2024 and ETHGlobal Waterloo.

- Strong skills in building secure, user-centric Web3 applications.

- Proficient in both Web2 and Web3 technologies for seamless integration.

Feedbacks

Thank you

Together, we're not just predicting the future —we're creating it."
